

Developer Delphi

Job Description

Betologic is looking for talented, creative and passionate Software Engineers to help the company tackle the most challenging problems in the gaming industry and build products that will shape the future of sports betting. If you enjoy building complex, scalable, highly available systems and want the fun and feel of an innovative company then it's time to join us. Be a part of this fantastic new opportunity and inspiring culture of relentless innovation.

BASIC QUALIFICATIONS

- BSc in Computer Science or related discipline
- Junior or experienced with 4+ years of related work experience in Delphi environment with a proven track record in designing, developing, documenting, and delivering high-performance, reliable, reusable, extensible, and maintainable technical solutions
- Technical expertise including fluency in several popular programming languages
- Experience shipping one or more large-scale, highly available applications, client-server programming, load balancing, network security, and internet protocols
- Good English communication and cross-group collaboration skills
- Ability to work effectively in a team environment.

PREFERRED QUALIFICATIONS

- Ability to understand and integrate new technologies
- A proven track record of technological and business success
- Delphi
- Experience with caching, concurrency, distributed technologies and multithreading
- Experience with SQL (e.g. Microsoft SQL Server or oracle), stored procedures and triggers, user-defined functions will be considered an advantage.
- Experience with development team tools such as RAD Studio and JIRA.
- Can build technical credibility.
- Ability to balance quality of code and fast delivery.
